

Campaigning in Your Community

You can help increase awareness and make connections from your personal circle of influence.

There is a tremendous opportunity to help children and strengthen our nation by improving the cognitive skills of each child. By concentrating on improving cognitive skills first (thus the name of our non-profit), each child's full learning potential can be unlocked.

Cognitive First™ goes beyond sponsoring a child to be evaluated and is joining with national and local alliance partners to sponsor and serve under-resourced children with the cognitive skill building exercises they need to improve their capacity to learn.

Cognitive First™ has established a reduced fee pricing from a leading product provider to serve children who qualify for or would qualify for the Federal Free and Reduced School Lunch Program. This has made access to products more affordable for the schools, the organizations and other programs serving disadvantaged children, and for those who wish to sponsor children.

Core skills can be strengthened in a one-time intervention lasting 8-15 weeks during a semester or summer.

The change lasts for a lifetime!
